

MENTAL HEALTH DISORDERS ON THE RISE

The COVID-19 pandemic profoundly affected both mental and physical health across the U.S. According to the World Health Organization (WHO), in the first year of the pandemic, the global prevalence of anxiety and depression increased by 25%. Additionally, according to the National Alliance on Mental Illness (NAMI) and the National Institute of Mental Health (NIMH), among U.S. adults:

1 in 5

experienced a
mental illness –
52.9 million in 2020

1 in 20

experienced a serious
mental illness

1 in 15

experienced both a
substance use disorder
and mental illness

>12 million

had serious thoughts
of suicide

COMBATING THE MENTAL HEALTH CRISIS AND HELPING THOUSANDS ON THEIR RECOVERY JOURNEYS

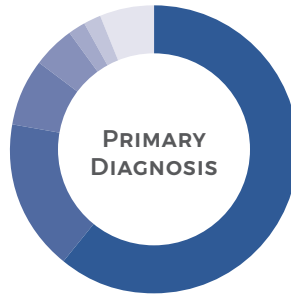

The Odyssey Psychiatric Network is committed to providing compassionate, comprehensive, and the highest quality individualized psychiatric and psychotherapeutic care for adults of all genders who suffer from mental illness, substance use disorder, and dual diagnoses while maximizing social functioning in the real world. Our full continuum of care is delivered in home-like settings to help each client feel safe, comfortable, and supported in their recovery journeys. Our Psychiatric Network offers long-term, sustainable solutions to help our clients achieve optimal levels of health and independence.

- Thought Disorder: 5.6%
- Personality Disorder: 4.8%
- Trauma: 4.4%
- Autism Spectrum Disorder: 1.8%

BASIS-24 ASSESSMENT

Our network uses BASIS-24 to identify a wide range of symptoms across the diagnostic spectrum. Using a five-point Likert scale, the 24 questions are scored using a weighted average algorithm that gives an overall score and scores for six subscales that cover the following domains: depression, relationships, self-harm, emotional lability, psychosis, and substance abuse. The questionnaire was administered at admission, mid-treatment or every 30 days, and again at discharge.

When compared to 23,172 residential treatment cases across comparable facilities nationwide, the Odyssey Psychiatric Network outpaced multiple industry benchmarks and helped thousands of clients progress in their recovery journeys in 2021. We're looking forward to Silver Pines becoming part of future outcomes reports.

↓ 36%

Across our Psychiatric Network*, our clients experienced a **36% overall reduction in symptom severity** from admission to discharge

Our Psychiatric Network* facilities exhibited reductions in patient symptoms across all subscales.

* Current outcomes reports include Clearview, Lifeskills, and Pasadena Villa.
